**Precast Flooring**

All precast flooring options are prestressed with tensioned steel reinforcement in a factory environment, and can be customised based on customer requirements, with voids inserted, lengths and width variations carried out, or extra reinforcement or strength variations accommodated for.

The O’Reilly Design Office has experience with all types of projects and is ready to assist with the latest computerised tools for floor design.

**Hollowcore Flooring**
- Open void
- High Pressure Dry Extruded Process
- Excellent sound and heat insulation
- 7no to 10no strand reinforcement
